

### WATERTOWN PLANK ROAD INTERCHANGE U-RAMPS

The new Watertown Plank Road interchange at US 45 will be a free-flow interchange. A free-flow interchange is an interchange in which all roads are built at separate grades eliminating the need for traffic signals at ramps. In this particular interchange, there will be two U-Ramps providing for free flow movements to US 45 Northbound and Southbound. These U-Ramps will allow traffic desiring to enter US 45 to travel over both northbound and southbound US 45 before entering US 45. Eastbound traffic on Watertown Plank Road can enter one U-Ramp and then access either US 45 Southbound, or continue over US 45 to enter US 45 Northbound. Westbound traffic on Watertown Plank Road can enter the other U-Ramp and then access either US 45 Northbound or continue over US 45 to enter US 45 Southbound.
